Hazards on the jobsite and on the road

Trucks backing with a blocked rear view	→	Other drivers who speed or tailgate
Crews on foot near moving vehicles	→	Texts and calls that pull your eyes down
Rough, muddy or soft haul roads	→	Rain, fog, glare and darkness
Dust, noise and tight turns	→	Long days and early starts that cause fatigue
Loose tools and materials in the cab	→	Work zones, school zones and busy intersections

Crew handout

Driving safety at work

29 CFR 1926.601

Do

- Walk around and check your vehicle before the first trip of the shift.
- Report every defect, and leave the vehicle parked until it is fixed.
- Buckle up on every trip, and make sure every passenger is buckled.
- Put your phone out of reach and set the GPS before you move.
- Leave space to stop, and add more in rain, fog or darkness.
- Secure tools and materials so nothing can fly forward in a hard stop.
- Use an observer when you cannot see behind you, and stop if you lose sight of them.

Don't

- Do not drive a vehicle with a defect that has not been fixed.
- Do not text, call or read while the vehicle is moving.
- Do not ride in a truck bed or anywhere without a secured seat.
- Do not back up without looking first.
- Do not drive drowsy, impaired or rushed.

SAMPLE

Remember **Phone away, belt on, speed down, and check your vehicle before you roll.**
