Fall hazards on the site and on the road

Work areas that go dark before the shift ends	Darker commutes after the clocks fall back
Slick ramps, stairs, ladders and scaffold planks	Low sun glare at sunrise and sunset
Heaters near tarps, fuel and closed spaces	Deer, school buses and kids walking at dawn and dusk
Wind grabbing sheets, tarps and loose panels	Wet leaves and frost on roads and windshields

Crew handout

Fall season safety

29 CFR 1926.21, 1926.56, 1910.22, 1926.1053, 1926.154, 1926.601

Do

- Check and move work lights before the sun goes down.
- Clear wet leaves, mud and frost from walkways, steps and ramps early.
- Keep heaters level, ventilated and at least 10 feet from combustible tarps (29 CFR 1926.154(a)(1), (b)(4), (c)).
- Wear layers you can shed, and keep a dry set of clothes in the truck.
- Clear every window and light before you drive, and turn on your headlights.
- Watch for deer, school buses and people walking at dawn and dusk.
- Know the emergency plan: where to go and who takes the head count.

Don't

- Do not work on a scaffold covered with ice, frost or wet leaves, except to clear it.
- Do not run fuel-burning heaters or engines in a closed space without ventilation.
- Do not set a ladder on a slippery surface unless it is secured or has slip-resistant feet.
- Do not drive drowsy after the time change; pull over somewhere safe and rest.
- Do not ignore storm warnings; know who calls a stop to work.

SAMPLE

Remember **Fall changes the light, the ground and the weather, so change your habits with it.**
