MODULE 1

The hazard: heavy trucks and blind spots

What makes forklifts risky	→	What makes pedestrians vulnerable
They are heavy and can be hard to stop	→	They can step into a blind spot in an instant
Loads can block the driver's view	→	Phones and earbuds hide the sound
They turn and steer differently from cars	→	They assume the driver sees them
Forks can pin or crush	→	Wet floors and clutter cause slips

Crew handout

Forklifts and pedestrians: see each other, stop if you cannot

29 CFR 1910.178, 1910.176

Do

- Drive only if trained, evaluated and authorized
- Examine the truck before use and tag out defects
- Look in the direction of travel
- Sound the horn and slow down at cross aisles
- Travel with the load trailing if it blocks your view
- Use marked walkways and crossings
- Wait for eye contact before crossing
- Keep aisles, fire aisles and exits clear

Don't

- Do not stand or walk under forks, loaded or empty
- Do not let unauthorized people ride on a truck
- Do not drive up to anyone standing at a bench or fixed object
- Do not walk in truck areas with a phone or earbuds
- Do not use a defective truck

SAMPLE

Remember **If you cannot see each other, stop.**
