MODULE 1

How tools hurt people

- [ ] Cuts and punctures from blades, bits and sharp edges
- [ ] Flying chips, sparks and wheel fragments that strike the eyes and face
- [ ] Kickback when a saw blade binds in the cut
- [ ] Shocks and burns from damaged cords and tools
- [ ] Struck-by injuries from dropped tools and from fasteners fired by nailers or powder-actuated tools
- [ ] Hearing damage, dust and fumes from tool work

Crew handout

Hand and power tool safety: crew handout

29 CFR 1926.300, 1926.301, 1926.302, 1926.303, 1926.304, 1926.102

Do

- Inspect every tool before you use it, including tools you bring from home
- Use the right tool for the job
- Keep guards in place and working
- Unplug, remove the battery or bleed the air before changing blades, bits or wheels
- Check cords, plugs and hoses for damage before use
- Wear eye protection with side protection, plus the other PPE the task calls for
- Secure the work with clamps or a vise
- Tag damaged tools and take them out of service

Don't

- Use a tool with a cracked handle, a mushroomed head or sprung jaws
- Pin back, remove or bypass a guard
- Carry, hoist or lower a tool by its cord or hose
- Blow dust off yourself with compressed air
- Point a powder-actuated tool at anyone, loaded or empty
- Refuel a gas-powered tool while it is running

SAMPLE

Remember **If a tool is damaged or missing a guard, tag it and take it out of service until it is fixed.**
