MODULE 1

The hazard: one release can hurt many people

What can go wrong	→	What prevents it
A toxic release	→	Written procedures that match the job
A fire or explosion	→	Training before operating
A skipped step or unreviewed change	→	Management of change
Equipment that was not inspected or tested	→	Inspection, testing and repair
A contractor who did not know the hazards	→	Permits, safe work practices and incident investigation

Toolbox KITS

Crew handout

Process safety: procedures, training, change, report

29 CFR 1910.119

Do

- Ask which processes in your area are covered
- Follow the written procedure and stay within limits
- Get trained before operating a new process
- Use management of change before any change
- Use the permit and safe work practice for each special job
- Report leaks, alarms and close calls
- Know your alarms, escape route and muster point
- Tell the supervisor when a procedure does not match the job

Don't

- Do not run a unit on a workaround
- Do not swap a part without a change review
- Do not skip a hot work permit
- Do not ignore an alarm because it always trips
- Do not assume contractors know the hazards

SAMPLE

Remember **Follow it, change it right, report it.**
