MODULE 1

Spring changes the job site fast

- [ ] Ground that held firm all winter turns soft as it thaws and soaks up rain
- [ ] Trenches and low spots fill with water, and spoil piles get loose
- [ ] Storms bring high wind, hail and lightning with little warning
- [ ] Winter damage shows up on ladders, scaffolds, cords and equipment
- [ ] Busy schedules often bring new or returning workers onto the crew

Spring safety on the job

29 CFR 1926.21, 1926.651, 1926.451, 1926.1053, 1926.20, 1926.51

Do

- Stay out of trenches until they are inspected after rain
- Get down from ladders, lifts, roofs and scaffolds at the first thunder
- Set ladders and scaffolds on firm, level ground, and check again after rain
- Clean mud off your boots before you climb
- Wear long sleeves and pants in brush, and check for ticks after work
- Drink water often and take breaks in the shade on the first hot days
- Tag or remove anything winter damaged, and report it
- Know who calls stop and where we shelter in a storm

Don't

- Don't work in a trench with water in it until precautions are taken
- Don't stay on a scaffold in a storm or high wind
- Don't reach into brush, holes or piles without looking first
- Don't mix cleaning chemicals or skip the label
- Don't run equipment if allergy medicine makes you drowsy
- Don't go near downed power lines after a storm

SAMPLE

Remember **Spring conditions change fast. Check after every storm, and stop work when the weather turns.**
